

## Returning Home

The implementation of a biosecurity plan does not stop at the end of a show. Taking precautions when you return home is just as important as those you take before and during the show.

Biosecurity steps to consider when you return home:

- Clean, disinfect and dry all equipment that was taken to the show including trailers, even if the show was terminal.
- Isolate any returning pigs from your home herd.
- Work with your veterinarian to determine the length of time for isolation and for any health testing requirements.
- Monitor returning pigs daily for signs of illness and alert your veterinarian if you have concerns about your herd's health.
- If your pigs do get ill, it is very important to allow those pigs to fully recover before going to another show.
